

PIXL - Audit Report

SUMMARY

PIXL is a new competitor in the meme-coin space that provides for frictionless fee redistribution and liquidity adds.

We audited PIXL's token contract at [0x5b2b5bd1e5c53870fe135fb7b289d686f762858d](https://www.bscscan.com/address/0x5b2b5bd1e5c53870fe135fb7b289d686f762858d) on the Binance Smart Chain mainnet.

Overview of the Contract:

- *The total supply of the token is set to one quadrillion.*
- *No mint or burn functions are present; though the circulating supply can be reduced by sending tokens to the 0x..dead address, if desired.*
- *As of the date of this report, ~24% of the token's supply is in the Pancakeswap pair. 95% of liquidity is locked for 5 years.*

Please review our Terms & Conditions, Privacy Policy, and other legal information [here](#).

By using this site, you explicitly agree to these terms.

- *Users who hold tokens will automatically receive a portion the fees from a transaction tax on each transfer.*
- *A portion of the fee charged on transactions is stored in the contract and, once a threshold value is met, used to fund PancakeSwap liquidity.*
- *Liquidity-adds are funded by selling half of the tokens collected as fees, pairing the received BNB with the token, and adding it as liquidity to the BNB pair.*
- *There is a transfer limit of 5 trillion tokens per transaction.*
- *The owner of the contract can exclude and include users from transfer fees, update the maximum transaciton amount, update the fee percentages and update how the fees are allocated.*
- *The team has renounced ownership, so the they can no longer update any of the tax variables or exclude any accounts as mentioned above.*
- *The contract utilizes SafeMath libraries to prevent overflows along with following the BEP20 standard.*

Audit Findings Summary

- *No external threats were identified in our analysis.*
- *Date: April 15th, 2021*

EXTERNAL THREAT RESULTS

Please review our Terms & Conditions, Privacy Policy, and other legal information [here](#).
